

# PAGE\_29\_SECURITY\_DIRECTORY

**URL:** <https://securityblogs.com.au/security-directory/> **Airtable table:** SB · 29 · Security Directory **Page kind:** listing **Sections in spec:** 4

## Business Purpose

Directory of partner / community / vendor brands in the security industry.

## Sections (top to bottom)

| # | Section        | Block type    |
|---|----------------|---------------|
| 1 | Hero           | hero          |
| 2 | Filter sidebar | rich-text     |
| 3 | Partner cards  | grid (server) |
| 4 | Featured strip | rich-text     |

## Airtable Tables

| Table                        | Use                                                             |
|------------------------------|-----------------------------------------------------------------|
| SB · 29 · Security Directory | Per-section spec for /security-directory/ (one row per section) |
| SB · 00 · Pages Index        | Master index entry                                              |
| SB · DOCS · Index (proposed) | Links this MD/PDF to the Airtable page record                   |

## PostgreSQL Tables (used by this page)

| Table    | Use                               |
|----------|-----------------------------------|
| partners | Partner directory cards           |
| services | Service catalogue + per-card data |

## API Endpoints

| Endpoint                                          | Method | Cached   | Purpose                  |
|---------------------------------------------------|--------|----------|--------------------------|
| GET /api/services?where[status][equals]=published | GET    | ISR 60s  | Service list             |
| GET /api/partners?where[status][equals]=active    | GET    | ISR 60s  | Partner list             |
| GET /api/globals/settings                         | GET    | ISR 600s | Brand + contact + footer |

| Endpoint                                        | Method           | Cached  | Purpose        |
|-------------------------------------------------|------------------|---------|----------------|
| GET /api/redirects?where[isActive][equals]=true | GET (middleware) | 60s mem | Redirect rules |

## Request Schemas

No request body — this page only consumes GET endpoints.

## Response Schemas

GET /api/pages?where[slug][equals]=...

```
{
  "docs": [{
    "id": "rec...",
    "slug": "security-directory",
    "title": "Security Directory",
    "modules": [
      { "blockType": "hero", "h1": "...", "subtitle": "...", "ctas": [...] },
      { "blockType": "rich-text", "title": "...", "body": { /* Lexical JSON */ } }
    ],
    "status": "published"
  }],
  "totalDocs": 1
}
```

## React Components

| Component                       | Purpose                                      |
|---------------------------------|----------------------------------------------|
| app/security-directory/page.tsx | Server component — fetches CMS data, renders |
| components/layout/Navbar.tsx    | Component used on this page                  |
| components/layout/Footer.tsx    | Component used on this page                  |
| components/layout/Navbar.tsx    | Shared header                                |
| components/layout/Footer.tsx    | Shared footer                                |

## Node.js Services

| Service / module | Purpose                               |
|------------------|---------------------------------------|
| lib/cms.ts       | Typed Payload REST client — all reads |
| middleware.ts    | Edge middleware — CMS redirect rules  |

## Environment Variables

| Var                  | Required? | Purpose                       |
|----------------------|-----------|-------------------------------|
| NEXT_PUBLIC_SITE_URL | Yes       | Canonical site URL            |
| CMS_URL              | Yes       | Where lib/cms.ts fetches from |

| Var             | Required?  | Purpose                    |
|-----------------|------------|----------------------------|
| PAYLOAD_API_KEY | Yes (prod) | Server-side CMS write auth |
| SENTRY_DSN      | Yes (prod) | Error tracking             |

## Validation Rules

No user input on this page. Read-only validation: ISR cache freshness, CMS reachability.

## Authentication Rules

- Public read of all page-driving CMS endpoints.
- No user session required.
- Middleware runs on every request but reads via server-only PAYLOAD\_API\_KEY.

## Deployment Notes

- Server-rendered Next.js page (ISR). NOT compatible with output: 'export'.
- First deploy requires `pnpm payload migrate + relevant pnpm seed:*` before booting.
- Caddy reverse-proxies port 3000 (marketing) — see DEPLOYMENT\_GUIDE §6.

## Testing Procedures

### Local smoke

1. `pnpm dev` (marketing site at `http://localhost:3000`)
2. Navigate to `/security-directory/`
3. Verify hero renders, navigation works, no console errors

### Production checks

- Lighthouse Performance  $\geq 85$  on landing pages
- Lighthouse Accessibility  $\geq 95$
- Lighthouse SEO = 100
- Sentry: no new error fingerprints after deploy
- Uptime monitor green

## Troubleshooting

| Symptom                        | Likely cause                   | Fix                                                          |
|--------------------------------|--------------------------------|--------------------------------------------------------------|
| Page returns 500               | CMS unreachable                | Check CMS_URL + CMS service status                           |
| Content stale after admin edit | Cache not purged               | <code>revalidateTag()</code> or wait for revalidate interval |
| Sitemap missing this page      | CMS Pages record not published | Set status=published                                         |
| Navbar/footer shows defaults   | Settings global missing        | Run <code>pnpm seed:settings</code>                          |

# Change Impact Analysis

## If you change...

- **Copy / hero text:** Low impact. Edit the CMS record (or `app/security-directory/page.tsx` if still hardcoded). Wait for ISR.
- **Sections order:** Medium impact. Re-order modules in admin. Renders instantly on next ISR.
- **Add a new module type:** High impact. Add block to `cms/src/collections/Pages.ts`, add component to `components/modules/blocks/`, add dispatch in `ModuleRenderer.tsx`.
- **Slug: CRITICAL — breaks every URL.** Add a `Redirects` record from old slug → new BEFORE updating. Notify SEO if any external links exist.
- **Authentication scope:** Edit `cms/src/access/*.ts`. Roles changes only by `super_admin`.
- **API endpoint shape:** Breaking change. Bump version, dual-route for 30 days, document migration.

## Rollback Procedures

1. **CMS content rollback:** Use Payload versions UI (`/admin/collections/pages/<id>` → Versions tab). Revert to a prior snapshot.
2. **Code rollback:** `git revert <bad-commit>` on `phase-c-frontend-rewire`, push, redeploy.
3. **Schema migration rollback:** Restore Postgres from nightly backup (see `DEPLOYMENT_GUIDE` §7).
4. **Deploy rollback:** `systemctl stop sb-web && git checkout <prev-commit> && pnpm build && systemctl start sb-web`. <5 min.
5. **DNS-level rollback (emergency only):** Revert A record to the last static-export Hostinger IP (5-minute propagation).

---

Notes: Reads via `getPartners()` with type filter. AU-region partners surface first.
